Introduction to the Committee of Reference

The Committee of Reference comprises of independent, experienced individuals from a range of backgrounds. Alongside Premier Miton, the committee is responsible for reviewing and amending, where necessary, and subject to the fund's prospectus, the responsible investing and ESG criteria, themes and exclusions.

- The committee meets three times a year to monitor the companies held in the fund and new investments to ensure they comply with the agreed ESG criteria, themes and exclusions.
 - Committee members may suggest potential investments and raise relevant issues with the fund managers, either at formal meetings or at other times, should they so wish.
 - The fund managers will report all new investments to the committee at the meeting following the date of the new investment. The committee may raise concerns on any investment, if they believe it is unsuitable for inclusion in the fund for responsible investing reasons. These concerns will be reviewed by the fund managers and may result in discussions with the company.
 - Companies are analysed against the themes that the fund managers seek to invest in or avoid; this investment approach is reviewed on an annual basis by the committee and the fund managers.
